1958-59 SEASON

Cumberland Valley Nurseries

INC.

McMINNVILLE • TENNESSEE

• • • WHERE BETTER NURSERY STOCK IS GROWN • • •

Serving the Orchard Trade for more than Forty Years

RICHHAVEN

The Richhaven is a large peach, bright golden in ground color, overlaid with a large, bright red blush on the area exposed to the sun, with stripes of red and gold on the opposite side. Fruit is nearly round, and uniform in size and shape. Very attractive in appearance. Pubescence, or fuzz, is so short and soft as to be nearly unnoticeable. An unusually thick, tough skin adds to the handling and shipping ability of the fruit. Flesh is clear yellow with a moderate amount of red near the pit. It is medium in texture and resistant to browning. The stone is entirely free, even when fruit is firm ripe. Richhaven has made a good record in commercial canning trials. The season of maturity is about with Halehaven, or 14 days before Elberta. Because of its brighter color, it might be picked two or three days before Halehaven. Trees are large, vigorous and productive.

REDSKIN

(Requires 750 freezing hours for bloom buds.) Redskin is a new introduction of the Maryland Experiment Station, and is a cross between Hale and Elberta. It ripens slightly ahead or with Elberta. Tree is vigorous, fast growing and productive. Wood is hard and the buds survived a low winter temperature in 1942-43, along with the hardiest varieties, indicating that it is very bud hardy. Fruit is round, yellow flesh, with little or no color near pit. It is a complete freestone, firm flesh of excellent shipping quality, well colored with a deep red blush covering the fruit even when ripening under shade conditions. In taste, it is aromatic, vinous and sweet. Due to the firmness, it is rated high for canning. Fruit a good size even with heavy load on trees.

SUNHAVEN

The Sunhaven peach is medium-large, nearly round and uniform in shape. Skin color is much like Redhaven, largely bright red with enough bright golden ground color for attractive contrast. Pubescence, or fuzz, is so short and soft it is almost unnoticeable. The fruit keeps and handles unusually well for such an early maturing variety. Flesh is clear yellow, fine-textured, firm, of good flavor and very resistant to browning. Freestone when fully ripe, but otherwise a partial cling. This early maturing variety with bright color and excellent flavor make it highly desirable for fresh fruit market. The season of maturity is 10 days earlier than Redhaven and 40 days before Elberta. Trees are very large, vigorous and productive.

Dear Friend:-

It is with pleasure that we present our catalog for the 1958-59 season. We will be happy for you to look through this carefully, and make selection of your planting needs. You will find our listings most complete, and our descriptions brief and authentic.

Our trees and plants are fine as can be grown, and we are offering them at prices almost the same as in previous years, despite the general increase in every other commodity. Last year, we were short on many items, and consequently many customers were disappointed. By the same token, many items will be short in supply this season. Therefore, PLEASE order early to avoid these same disappointments.

Serving the fruit growers and home owners with quality nursery stock has long been a tradition with us. We are proud of the more than forty years of continuous service to our customers. We offer you many of the old tested and tried varieties, and in addition to the new ones that have been found worthy of a place in your orchard.

May we hear from you soon? We will appreciate your order, whether you wish to plant one tree or thousands. We can prosper only in proportion to the satisfaction rendered our customers. With this principle in mind, we hope to merit the confidence of many new customers each year.

Prices in this catalog are effective for the 1958-1959 season, or until supplemented by a new issue of our catalog.

ORDER NOW-RESERVE YOUR TREES WHILE SELECTIONS
ARE STILL COMPLETE.

Cordially,

President

MORE THAN FORTY YEARS OF CONTINUOUS SERVICE TO OUR CUSTOMERS

J. R. BRAGG, President
Founder and
Lifelong Plant Enthusiast

Serving the Fruit Growers and Home Owners with Quality Nursery Stock has long been a tradition with us. We have specialized in growing highest quality fruit stock for the Commercial Orchardists for more than forty years.

We advise our Orchard trade to produce their fruit on young trees to keep production costs to minimum. This also enables them to keep abreast of the time with the newer and better varieties.

Variety and Tree selection can mean quicker results and more profit, as well as consumer satisfaction.

APPLES

The King of Fruits

EARLY SUMMER APPLES

Anoka. Bears on very young trees. Fruit large, faintly striped red; of delicious, tart flavor. Fine for cooking a month before ready for eating.

Lodi. Improved Transparent, the favorite early summer apple. Skin clear yellow; flesh white; flavor slightly acid.

Red June. An early summer Apple, producing medium-sized red fruit of distinctive flavor. Very productive and a splendid eating Apple; also fine for cooking.

FALL AND WINTER APPLES

Red Jonathan. One of the best in quality. Rich flavor; brilliant red skin. Excellent for both commercial and home use.

Grimes Golden. One of the best yellow Apples. Fine grained and juicy, with very pleasing, spicy flavor. Widely planted to pollinate self sterile varieties.

Yellow Delicious. Fine, firm-textured flesh, with golden yellow skin and pleasant flavor. An excellent variety for winter storage.

Dark Red Delicious. The most popular Apple of all time. Brilliant dark red color. Tree is one of the hardiest. A "must" in every orchard.

Virginia Red Winesap. One of the foremost Apples for both commercial and home use, and a universal favorite. An early bearer and very productive. Beautiful dark red skin; yellow flesh, firm, tender and juicy.

Red Rome Beauty. An improved Rome Beauty, identical in vigor and production. One of our most beautiful Apples and a favorite wherever grown. Bears large crops of delicious fruit.

1 yr. 3 to 4 ft.	1.15	1.00	.70	.50

SENSATIONAL 5-N-1 APPLE

A Whole Orchard on a Single Tree

Five different varieties of Apples budded onto one Apple stock; gives you a chain of ripening, from early to late. Plant this in a corner of your yard or garden, and delight your family and friends. **2 yr. 4 to 6 ft. size, \$2.50 each; 3 or more, \$2.25 each.**

DWARF APPLE TREES

Requires Little Space to Produce Big Delicious Fruits

Besides being a beautiful addition to the landscape, they develop crops of fruit each year. Never spread or grow taller than 12 to 15 feet, and make a colorful ornamental tree. Most varieties start fruiting the second or third year after planting. We offer four choice varieties: Dark Red Delicious, Yellow Delicious, Red McIntosh, and Dark Red Stayman. **2 yr. 3 to 4 ft. size, \$3.25 each; 3 or more, \$3.00 each.**

PEACH TREES

Plant Cumberland Valley Dependable Trees

A PEACH FOR EVERY SECTION

Quality Peach trees is not a mere matter of the size of the trees at the time of purchase. It includes the horticultural skill, knowledge, care and personal integrity actually employed from the securing of the Peach seed to the delivery of the stock.

Peaches are one of America's best-paying crops. While the trees prefer a well-drained, sandy loam, they will adapt themselves to almost any well-drained location if given proper care. Varieties are listed in about the order in which they ripen. See schedule for ripening schedule, freezing hours, and other data.

Mayflower. The earliest Peach, but blooms late and is seldom damaged by frost. Size medium, round; bright red all over; ripens well to the seed. Tender, juicy, excellent flavor. Tree very prolific. Clingstone.

Hiland. A highly colored yellow-clingstone peach, being a cross between Southland and Hiley-Halehaven. Ripens just before Cardinal, or about five days before Dixired.

Cardinal. Fruit well covered with attractive red blush over good yellow ground color. Flesh is yellow, firm, medium textured and good flavor. About size of Dixired, with similar appearance and firmness, and ripens about four days ahead of same.

Maygold. Ripens about three days before Dixired. Fruit is clingstone, of medium size, and attractively colored with red blush over yellow ground color. Flesh is yellow, firm but melting, medium-textured, and of good flavor. The outstanding characteristic of Maygold is the relatively short chilling requirement to break the rest period of its buds. Highly recommended for southern planting.

Dixired. Clingstone. Superior new variety of medium size, round with attractive blush. Yellow flesh, of medium texture and good flavor. Fruit acquires color long before ready to pick.

Redcap. A Southland-Dixired cross, ripening just ahead of Dixired and resembling this peach very much. A clingstone, medium size, round. Flesh is yellow, firm, but melting; medium textured and good flavor.

Sunhaven. Sunhaven originated from the cross: Redhaven x SH 50 (J. H. Hale x Halehaven) made at South Haven in 1944. The season of maturity is 10 days earlier than Redhaven and 40 days before Elberta. Trees of Sunhaven are large, vigorous and productive. No permanent injury resulted to trees of this variety following—19°F. on November 25, 1950, although fruit buds of all varieties were killed. Sunhaven has been consistently productive, even following unfavorable blossoming weather in the springs of 1949 and 1954. Fruits of Sunhaven are medium-large in size, nearly round, and uniform in shape. Skin color is much like Redhaven, largely bright red with enough bright golden ground color for attractive contrast. Pubescence, or fuzz, is so short and soft it is almost unnoticeable. The fruits keep and handle unusually well for such an early maturing variety. Flesh is clear yellow, fine-textured, firm, of good flavor and very resistant to browning. Sunhaven is a freestone when fully ripe but otherwise a partial cling. So far, peach breeders have had to sacrifice some freeness of the stone where extra earliness is desired. Sunhaven's principal value should be as a very early maturing variety of medium to large size, bright color and excellent flavor for the fresh fruit market.

Coronet. A highly colored yellow peach, with good yellow ground color. Flesh yellow, firm but melting, smooth-textured; good mild flavor and a freestone when ripe. Trees are vigorous and productive.

Jerseyland. An early, large, firm attractive yellow-fleshed freestone. Hangs on well to the tree and is an excellent shipper. Tree is hardy, sets fruit buds freely and comes into bearing early.

Early Fair. A bud sport of Fair Beauty, with the same qualities, but ripening about one week earlier, and highly colored.

Redhaven. Among the best for its season. Beautiful color, firmness, high quality, and good consumer demand add popularity for this peach. Colors a bright red and beautiful yellow. Skin is smooth, almost fuzzless. Flesh is very firm. Tree vigorous with heavy bud set and bears young.

Ranger. A fine looking yellow freestone peach, ripening with or just after Golden Jubilee. Medium to large size, almost round, with light pubescence, highly colored with bright red blush covering almost all the peach. Flesh yellow, medium firm, medium textured, good flavor and suitable for canning or freezing. Tree is vigorous and productive, showing marked resistance to bacterial leaf spot. Blossoms medium sized, self fertile, usually after Elberta. Has been tested in Md., S. C., Ga., Texas, West Va., and Del., and should prove valuable in the central peach area. This is a U.S.D.A. introduction.

Keystone. Yellow-fleshed free-stone, ripening three weeks earlier than Elberta. It is large, has good quality, and appears to be firm enough for shipping. The peach is the result of a cross between Newday and Southland. It ripens a week earlier than Southland, and is fully as attractive in appearance. Also, it has greater resistance to bacteriosis than has Southland.

July Elberta (Burnett Elberta). A large, medium early freestone peach ripening with or slightly before Halehaven. Fruit is golden yellow, overspread with red. Quality is excellent for canning and fresh eating. Better than average for freezing.

Triogem. An early, oval, red all over, firm, yellow freestone peach. Trees are medium in size, hardy and heavy bearers. Requires good soil and good culture for best results.

Southland. Splendid new yellow-fleshed variety, ripening about sixteen days before Elberta. Freestone with little fuzz and extra flavor. One of the best for both home and commercial use. Fruit is medium to large size, round and has attractive light-red blush. Flesh is firm, slow softening, and medium textured.

Sunhigh. A large, red, bright, smooth peach, which colors well all over before it ripens. Softens slowly, making it an excellent shipper. Flesh inclines to adhere to the pit when hard ripe, but is generally freestone. Tree is spreading ingrowth, and buds are hardy. This variety seems to do best in hilly sections, and requires thorough summer spraying.

Richhaven. Richhaven originated from the cross: Redhaven x SH 50 (J. H. Hale x Halehaven) made at South Haven in 1944. Tested before naming as selection SH 297. The season of maturity of Richhaven is about with Halehaven or 14 days before Elberta. Because of its brighter color, it might be picked two or three days before Halehaven. Trees of Richhaven are large, vigorous and productive. They withstood -19°F. on November 25, 1950 without permanent injury, although fruit buds of all varieties were killed. Richhaven has had an excellent production record. Fruits are large, nearly round, and uniform in size and shape. The ground color is bright golden, overlaid with a large, bright red blush on the area exposed to the sun, with stripes of red and gold on the opposite side. Very attractive in appearance. Pubescence, or fuzz, is so short and soft as to be nearly unnoticeable. An unusually thick, tough skin adds to the handling and shipping ability of the fruit. Flesh is clear yellow with a moderate amount of red near the pit. It is medium in texture and

resistant to browning. The stone is entirely free, even when the fruit is firm ripe. Richhaven has made a good record in commercial canning trials.

Halehaven. A hardy, heavy bearer of perfect freestone, yellow-fleshed fruit. Tree is a strong, thrifty grower, resistant to common diseases; fruit is large, oval shaped, with good tough skin, with beautiful red coloring. One of the finest peaches for "quick freezing."

Loring. (Frank by Hale Haven.) A large, firm, yellow-fleshed freestone with an attractive bright color of red and yellow over a yellow under color. This is a very promising new variety, and from reports we have had from one end of the country to the other, Loring has met with the approval and success in growing. Blooms early, requires short rest period, and ripens about ten days ahead of Elberta. It is of better quality than Elberta, a little hardier, and of good size and appearance.

Sullivan Early Elberta. A bud sport of Elberta, ripening seven to twelve days earlier. Fruit is average large in size, is of fine quality, and shows good shipping ability. A great success wherever planted.

Blake. (N. J. 117.) Fruits are medium to large, very highly colored with attractive red over good yellow ground color. It is a freestone, having considerable red at the pit, and extending to the flesh in some cases. Flesh is very firm with excellent flavor. Trees are good growers, ranks with Elberta in hardness of bud and tree. The size, its bright attractive red coloring and season of ripening should make the Blake a desirable peach to precede Elberta, which it does by about one week.

Belle of Georgia. Leading white variety for commercial plantings. Fruit large, with bright attractive red almost covering the white background. Flesh white, highly flavored and very firm. Very vigorous, hardy, and productive.

Redskin. Redskin is a new introduction of the Maryland Experiment Station, and is a cross between Hale and Elberta. It ripens slightly ahead or with Elberta. Tree is vigorous, fast growing and productive. Wood is hard and the buds survived a low winter temperature in 1942-43, along with the hardiest varieties, indicating that it is very bud hardy. Fruit is round, yellow flesh, with little or no color near pit. It is a complete freestone, firm flesh of excellent shipping quality, well colored with a deep red blush covering the fruit even when ripening under shade conditions. In taste, it is aromatic, vinous and sweet. Due to the firmness, it is rated high for canning. Fruit a good size even with heavy load on trees.

Elberta. Still the most popular peach on the market, and universally planted. Yellow freestone of excellent quality; juicy, firm but tender. Tree is hardy, productive and disease resistant. Not the best in quality, but its size, color and firmness combine to give it first place in both commercial and home orchard plantings.

Shipper's Late Red. Splendid peach to follow Elberta. A large, very highly colored, attractive red, yellow-fleshed freestone. Good quality. A good shipping peach, extremely productive. Very hardy and its beauty and size enables it to bring top prices on the markets.

Rio-Oso-Gem. Generally recognized as one of the better peach ripening after Elberta. Widely grown and a beautiful peach. A Hale type late peach following Elberta six to ten days. Fruit large in size with brilliant red color and light pubescence. The flesh is firm and fine textured with excellent flavor. Because of its firmness of flesh, it is excellent for freezing, canning, and other uses. Rio-Oso-Gem is an outstanding commercial variety.

Afterglow. Fruits are large, round, oval in shape and almost completely overspread with red. The flesh is yellow stained with red about the pit, and is free. Trees are vigorous and rapid growers.

CHERRY TREES

Healthy, Heavy-Bearing Trees—Easy to Grow

Large Montmorency. The universal canning and pie Cherry. Considered the finest sour Cherry in cultivation. Young trees produce tremendous crops of large, firm fruit.

Early Richmond. The leading early sour Cherry. Trees vigorous everywhere planted. Fruits dark red; flesh pale yellow, tender and melting.

Prices of Pie Cherries

	1 to 9 each	10 to 49 each	50 to 99 each
4 to 6 ft.—11/16"	2.40	1.85	1.25
3 to 4 ft.—9/16"	2.00	1.65	1.05
2 to 3 ft.—7/16"	1.75	1.50	.95

Governor Wood. Light yellow with red cheek. Tender, rich, delicious flavor; large, firm, heartshaped fruit. Vigorous and productive. June.

Black Tartarian. The best sweet Cherry. Its great heart-shaped fruits of rich, dark purple look irresistibly tempting. The sweet, mild flavor and rich tang have won it a nation-wide popularity with both commercial and home growers.

Prices of Sweet Cherries

	1 to 9 each	10 to 49 each	50 to 99 each

Hansen Bush Cherry. A delightful ornamental shrub, producing delicious large, sweet, black Cherries. Very productive and hardy. Dwarf growing; 4 to 6 feet tall at maturity. Plant two or more for best results. **3 yr. bearing size, \$1.25 each; 3 or more @ \$1.10 each.**

PEAR TREES

Delicious Fresh from the Tree or Canned Large, Vigorous Trees Bearing Enormous Crops

New Orient. One of the very few almost entirely immune to blight. Its fruit is excellent fresh or canned; melting, juicy, mild subacid flavor. Fruit round, yellowish with red blush. Interplant with Kieffer for pollination purposes. Late August.

Bartlett. Grown profitably in every Pear-growing section of America. Trees vigorous, bearing when young. Fruits large and long, with clear yellow color when mature. Flesh fine grained and juicy. September 1 to 10.

Douglas. Ripens about August 15 and is the youngest and heaviest bearing variety that we have to offer. Two- and three-year-old trees are often loaded with beautiful, yellow Douglas Pears. Blight resistant.

Kieffer. This standard variety is widely known. Trees grow to large size. Fruit long and heavy; flesh coarse and not so sweet. Largely planted for canning and is excellent for preserving. Late September.

Orange Quince. Excellent for Jelly, Jam and Marmalade. Large, orange-shaped; fine, firm, golden flesh of excellent quality.

APRICOT, NECTARINE, PLUM AND PRUNE TREES

*For a Taste Treat Eat These Delectable Fruits
Fresh from Your Own Garden*

Moorpark Apricot. An attractive variety of high quality and fine flavor. Fruit is large, deep yellow, with a red cheek. Grows to about the same size as a Peach tree. Mid-August.

Garden State Nectarine. New Fuzzless Peach. A beautiful big peach with smooth, golden yellow skin, almost completely covered with fiery red. Fruit is most delicious, with tangy flavor, golden yellow flesh and freedom from fuzz should make it popular in every Home and Commercial Orchard. Fine for eating fresh, Canning, Freezing, or Market. Trees are exceptionally hardy.

Surecrop Nectarine. "Fruit of the gods!" Lovely pink blooms in spring on small trees, and loads of sweet fruit in late summer. Smooth skin like plums; mellow, juicy flesh like peaches. Very fragrant. A treat whether fresh or canned. Self-pollinating. Hardy.

Stanley Prune. The sweetest and quickest to bear of any Prune yet grown. Often starts to bear the second year, and yields heavily every year. Fruit is covered with beautiful dark blue skin, over fine, sweet, juicy, golden flesh. Freestone, and a favorite for both canning and drying.

Blue Damson. Best-known Damson. Very vigorous, hardy and productive, often overlaid with fruit. Skin blue-black; flesh golden yellow and rather tart. Partly freestone. Wonderful for preserving.

Methley Plum. A fine variety for any purpose. Fruit is medium to large in size, reddish purple in color with red flesh. Tree is vigorous grower and does well on most types of soil. Heavy annual bearer.

Abundance Plum. A strong grower and an early and profuse bearer. Fruit medium to large, oblong, amber colored, nearly covered with bright red, with thick bloom. Flesh orange-yellow, juicy and of a delicious sweetness. Use as a pollinator for Burbank.

Bruce Plum. A heavy producer of very large red fruit, ripening in early June. Healthy, disease resistant trees; one of the best for the South.

Red June Plum. Mottled garnet-red color overlaid with delicate bloom; firm, light yellow flesh, aromatic and sweet. Trees are large, vigorous, hardy and productive. Blooms late and fruit is very resistant to brown rot and curculia.

CALIFORNIA TYPE GRAPES

Yes, you can grow them. They are Hardy. Varieties selected for flavor, size, and yield. They are delicious served fresh from vine and also for jellies, jams and juices.

Golden Muscat. New California-type Grape hardy where the old Muscats would not grow. Golden Yellow fruit with delicious, mild, sweet flavor. Firm and meaty flesh, with wonderful aroma. Large, waxy fruit. Heavy rooted 2-yr. vines, **\$1.00 each; 3 for \$2.60.**

New Seneca. Skinless, golden yellow, sugar-sweet. Firm, juicy meat and a deliciously sweet flavor, with skin that is edible. Perfectly hardy where other northern Grapes are grown. Heavy-rooted, 2-yr. vines, **\$1.00 each; 3 for \$2.60.**

STANDARD GRAPES

Invest in Vigorous Cumberland-grown Grape Vines. They need little except training, lots of sunshine and plenty of plant food.

Agawam. Vine hardy and most productive of all reds. Bunch and berry large, reddish brown; tender, vinous and of excellent flavor.

Concord. Most popular and most widely planted of all Grapes. Large bunches of medium-sized blue Grapes of excellent flavor.

Fredonia. A new, very early blue Grape with excellent flavor. Bunch and berry very large; very juicy and delicious. Vine vigorous and productive. Good shipper as well as popular home variety.

Lutie. Very sweet, attractive, red Grape. Large, compact bunches. Thin skin; tender flesh. So sweet that it preserves itself on the vine, the juice condensing to syrup. Mid-season.

Niagara. An old favorite. The best known of the white varieties. Serves as standard among the whites, as Concord does among the blues. Berries and bunches large. Does not crack easily and hangs on the vine well after ripening. Mid-season.

SOUTHERN MUSCADINE GRAPES

The Famous Grape of the South

Top Sail. This is a white-fruited variety that has been unanimously rated as being a better grape than Scuppernong. The vine is very vigorous and should not be pruned so heavily as other kinds for best yield, making it the best variety to plant if anyone desires an overhead arbor. The foliage is free from disease, fruit clings well, very prolific, medium early and very sweet.

James. Extra large berries, often measuring $3\frac{1}{2}$ inches in circumference, black, from three to ten berries on a bunch, extremely prolific and regular bearer. Ripens in September and October, and often hangs on the vines in eastern North Carolina until the last of November. Good commercial variety.

Hunt. Vine vigorous, foliage healthy and medium to heavy; prolific, regular bearer. Fruit large, black; bunches well and hangs on well. Clusters stem long. Skin medium to thin, pulp medium; excellent flavor. Ripens in August. Considered best of the black varieties.

Dulcet. A reddish purple grape, early, thin skinned, of high quality and very sweet. It forms medium sized bunches and do not fall but hang on the vine, if not picked, until they shrivel. Can easily be gathered in bunches. The fruit remains good over a long period and the vine is very productive, healthy and vigorous. Considered by many to be the best of all varieties for eating.

Tar-Heel. New self-fertile cross-pollinating Muscadine. Very vigorous, heavy producing and also pollinates other varieties at same time. Jet-black fruit of excellent quality. A "must" in every Southern garden. We recommend planting Tar-Heel with other varieties above to assure full crops.

2 yr. Self-Fertile plants: 1 to 5, \$1.75 each; 5 to 10, \$1.60 each; 10 to 30, \$1.35 each

RASPBERRIES

For Home and Market

Your Raspberry Success depends on the Quality of plants you start with. Plant our well-developed Raspberry bushes that are noted for their splendid root system.

Morrison. The new giant black Raspberry, praised by growers everywhere. Extremely large, shiny jet-black berries of fine flavor and less seedy than others. Vines are very productive, free from disease and very long lived.

Cumberland. Produces large, jet-black fruit, firm and of excellent quality. Starts to ripen in mid-season, continuing for several weeks. Fruit is large, plump, sweet and juicy, with a true "black-cap" flavor all its own. An ideal shipper.

Black Raspberry Prices

EBONY KING BLACKBERRIES

Hardy—Vigorous—Dependable

Increase your profit! One acre of Blackberries will average 800 to 2000 quarts, and prices on this fruit are always high. Plant Blackberries along trenches and lot lines, and turn waste garden space into profit. Excellent for home and market.

We offer Ebony King, the New Blackberry. Upright—Large—Sweet—Hardy—Early Bearer. No blanks or sterile plants. Best Blackberry available. This is the Blackberry we have been hoping for as other varieties have been disappointing crops. Ebony King, being the best and most prolific, we are discontinuing all others.

Strong 2-yr. Plants—6 for \$3.00; 12 for \$5.50; 25 for \$10.00; 50 for \$19.00; 100 for \$34.50

THORNLESS BOYSENBERRIES

Huge, Delicious Hybrid Fruit

Enormous size, excellent quality, thornless and proiific. Produced by cross breeding Raspberry, Blackberry and Loganberry. Delicious served fresh, frozen, canned or in jam. Excellent for freezing, retaining its natural flavor and sweetness. Sells for top prices on the market but a little soft for long shipment. Unique, rich flavor. Thornless, easy to pick. Color a pleasing purple.

Strong Plants: 6 for \$2.05; 10 for \$2.55; 25 for \$4.65; 100 for \$14.05; 250 for \$30.40; 500 for \$48.85; 1000 for \$85.00.

BLUEBERRIES

***Giant Cultivated Blueberries, the Aristocrats of the Bush Berry Family
Always Delicious Fresh or Frozen
Every Home Should Grow These Delicacies***

In addition to bearing profitable crop, the Blueberry is an attractive shrub, that may be planted on the lawn. Enjoy delicious Blueberries fresh, frozen or canned. Blueberry pie is hard to beat. We offer three leading varieties.

Jersey. The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over a gold brown. The berries are the largest of any here listed, of a very light color and ripens the same time as Rubel.

Dixie. Bush vigorous, open, spreading, productive. Berry very large, fair blue color, firm, good dessert quality. Late mid-season.

Burlington. Originated as a cross between Rubel and Pioneer. The picking quality of

the Burlington is superior to many due to complete separation of berry from stem. It ripens later than Jersey or Rubel and because of good keeping qualities may extend that season for 10 days. The fruit is above average dessert quality, being surpassed only by Stanley, according to most authorities. The bush is erect, vigorous and seems very healthy. The berries are a good blue color, medium to large and hold up in size to the end of the season. Recommended for trial in all sections.

STRAWBERRIES

A Delicious Fruit—Easily Grown **Plant Our Big Luscious Strawberries for Heavy Crop and Delightful Eating**

Healthy plants that will bear bumper crops. Varieties selected for flavor, size and yield. All Strawberries sent postpaid or express prepaid. Arrival in good condition guaranteed or we replace.

Blakemore. The ideal early shipping berry. Healthy plant that yields big crops. Fruit firm, of good color, and fine for long-distance shipping. Excellent flavor. Fine for freezing.

Armore. Proving more and more a grower's favorite each year. Introduced by the Missouri Experimental Station this variety has proved more productive than 60 others in actual growing tests. Berries are of excellent color and rate high in flavor. Fruits over a long period and makes a good fruiting row. Firmness rates it a superior shipping variety. We would recommend it for trial throughout the Premier, Blakemore growing areas. Our Armore plants are Virus Free.

Tennessee Beauty. Heavy yields—large, beautiful, firm berries is fast making it a favorite in central areas from North Carolina north to central Ohio and Pennsylvania. Introduced by the Tenn. Experimental Station, now being grown over a very wide area. Tennessee Beauty is considered the main commercial berry in many sections, and we can certainly recommend it to anyone who wishes a profitable midseason to late berry of unusual beauty and shipping ability. It is a free plant maker, very productive of large bright red, firm, high quality berries which are excellent for fresh use, shipping, preserving or freezing. Tennessee Beauty is being grown commercially in most all of the Southern states north to central Ohio, Penna. and N. J. and even the coastal area of N. Y. and New England. We recommend this variety and can supply in **Virus Free** or regular stock.

New Pocahontas. Fast becoming the growers' favorite throughout the East. Since its introduction Pocahontas has really come to the front in its field. Pocahontas has been widely acclaimed throughout the berry producing areas as the best of the new strawberry varieties. It brought highest prices wherever sold this past spring for any and all markets—fresh, frozen, or processed.

Originated at Beltsville, Md., and released in October, 1953 by the U.S.D.A. and the Va. Truck Exp. Station at Norfolk, Va. It has been thoroughly tested and found adaptable from the Carolinas to New York state and as far west as Arkansas. The plants are vigorous and very productive. Berries ripen about a week later than Blakemore, are large in size, color a vivid red, are glossy with tough skin and firm as Blakemore. The flavor is tart and good. Ideal for freezing. **Our Plants of Pocahontas are Virus free.**

Red Rich (Plant Patent 993). Here is the new everbearer you have read so much about. Honeysweet berries, rich red all the way through. The largest, reddest and sweetest everbearer you ever saw. Thrifty and hardy. Bears early in the season and continues until frost. Perfect for freezing.

GROW MORE BERRIES THIS NEW EASY PYRAMID GARDEN WAY

Now you can have continuous full season berries made possible with fertilizer applied and ample moisture supplied the PYRAMID GARDEN WAY. The Pyramid Garden takes only six feet of space and holds 75 plants 8 inches apart. This equals only one-third as much space as conventional garden berry plots.

EASY TO CARE FOR . . . All plants within easy reach. Terraces can be covered with peat moss or other material for aeration, moisture and weed retarding properties.

Everbearing Strawberry plants will always be everbearing under the "Pyramid Garden Way."

NEW! PYRAMID®

Corrugated! Complete Sprinkler Included!

This is the brand new, re-designed Pyramid® garden. SIX FOOT in diameter with three planting terraces. The 5" aluminum bands are now attractively corrugated and the completely new sprinkler is included as standard equipment with no increase in price. Remember, the sprinkler is no longer an accessory but is packaged in the Pyramid box and includes the sprinkler head, tubing and hose connection. Complete instructions for erection and planting Pyramid are contained in each box.

PYRAMID ACCESSORIES

SUPPORT STRIPS

If you plan on using either plastic cover or netting, strips must be installed first as support.

PLASTIC COVER

New type, weathers well. Acts as a cold frame or greenhouse for early planting and frost protection.

NETTING

Covers support strips and protects bed from birds. Also hold leaves in winter as cover.

PAPER-SHELL PECANS

The South's Best Tree Crop

Nut trees make good shade trees and yield wholesome, delicious food. The Pecan is probably the most profitable nut tree it is possible to plant. We are proud of our Pecan trees because they come from the original Curtis plantation, where the water-level produces an exceptionally good root system. Furthermore, they are perfectly hardy and may be planted with confidence. From numerous improved varieties we have selected the hardiest, which succeeds over a wide territory. Ideal for growing in the South, and also—being early, matures farther north than any other varieties.

Stuart Pecan—the Best all-purpose Pecan for all area. We offer you trees with excellent root system which makes them easy to transplant. Once established, the Pecan is a strong growing, shapely tree, which is long-lived. Perfectly hardy in or near the Cotton Belt and may be planted with confidence.

BLIGHT-RESISTANT CHINESE CHESTNUT

A Good Lawn Tree That Produces Fine, Sweet Chestnuts

These new blight-resistant trees will bear nuts two years after planting. They are fast growing trees, ideal to take the place of the old-fashioned American Chestnut that we all remember from our childhood days, now extinct from blight. The fruit is fully as delicious as the native Chestnut, and slightly larger in size. Tree grows to 35 feet tall. Best crops are insured by planting two or more trees for pollination.

HEDGE

Fence the Friendly Way with Beautiful Living Fences

A hedge is ornamental as well as it affords protection, costs less than metal, wood or stone fence, requires little attention and upkeep, last almost indefinitely. We especially recommend Evergreen Chinese Privet for home planting and landscape effect and Rosa multiflora for field fences.

THE WILD ROSE LIVING FENCE

(ROSA MULTIFLORA JAPONICA)

A Living Fence for Years to Come Needs Little Pruning—Disease Free

Multiflora Japonica Roses are becoming more popular as they become better known and are being used effectively to decrease soil erosion, dividing line fences, wind breaks, screens for unsightly objects, to confine farm animals and as snow fences in winter, in fact wherever a hedge or screen is necessary Rosa Multiflora is indicated.

The plants grow rapidly in most all types of soil and produce a fence up to eight feet in height in three to four years, then it stops, getting no taller. The fence needs no pruning or care after the initial setting.

In setting Rosa Multiflora Japonica the plants can be spaced to suit individual requirements. Where a close hedge or screen is desired, we suggest planting one foot apart. For more open hedge they may be planted two or three feet apart in a single row, naturally the closer they are planted the denser the hedge. If planted in the fall, remove the tops but wait until spring and cut back 2 or 3 buds. Mulch well where fall set.

The fence is a beautiful sight in bloom putting on a gorgeous display for about two weeks. Thereafter seed pods are formed to furnish food for the birds.

The foliage is a beautiful green and is free from disease and insect pests.

Jumbo, branched, 18" up: 10 plants \$3.50; 25 plants \$7.50; 50 plants \$12.50; 100 plants \$25.00; 500 plants \$75.00.

Strong vigorous, 12 to 18": 25 plants \$2.25; 50 plants \$4.15; 100 plants \$7.50; 500 plants \$30.00.

Light, 6 to 12": 25 plants \$1.50; 50 plants \$2.60; 100 plants \$3.95; 500 plants \$18.00.

EVERGREEN CHINESE PRIVET

(Ligustrum sinensis)

Also known as Amur River South Privet. Improved, evergreen type. Just as hardy as California Privet and has added advantage of retaining its glossy green foliage throughout the average winter. Rapid, compact grower, making a dense hedge in a short time. May be kept sheared to almost any desired height from 1 to 8 feet. Suitable for surrounding the entire home grounds or as a line between yards.

Planting. For a dense, compact hedge, plant 6 inches apart in a single row, pruning back within 2 or 3 inches of the ground at time of planting. For a screen, plant 12 inches apart.

FLOWERING SHRUBS

Beautify Your Home at Low Cost
Our Shrubs Are Select, Specimen, Finished Plants

Flowering shrubs are ever useful in any garden. They serve as borders and hedges along boundary lines, as screens, in foundation planting and as specimens on the lawn. There are so many kinds—all beautiful in their season—that it is not necessary to duplicate your neighbors' plantings. In flower, foliage and fruit, shrubs are decorative a good part of the year.

Abelia grandiflora. One of the most useful and beautiful of all flowering shrubs. Dark, glossy, evergreen foliage. Grows 4 to 6 feet tall, making it ideal for foundation plantings, hedges and shrub borders. Plant is covered spring to fall with clusters of dainty pinkish white flowers. Select 18 to 24-in. size, **\$1.50 each; 3 or more, \$1.25 each.**

Almond, Double Pink-Flowering. Attractive dwarf shrub. Double pink flowers in masses in early spring. Select 18 to 24-in. size, **\$0.85 each; 3 or more, \$0.75 each.**

Althea, or Rose of Sharon. An old-time mid-summer-flowering shrub, worthy of a place in modern planting. Double Pink, Purple, Red, and White. Select 2 to 3-ft. size, **\$0.75 each; 3 or more, \$0.65.**

Barberry, Red-leaved. Foliage bronze-red, turning to fiery-red in autumn. Popular for hedging or foundation planting. Select 18 to 24-in. size, **\$1.00 each; 3 or more, \$0.85 each.**

Butterfly-Bush, Charming. A very lovely shrub which produces lavender-pink spikes in summer. One of the most desirable of all flowering shrubs. Select 2 to 3-ft. size, **\$0.85 each; 3 or more, \$0.75 each.**

Crape-Myrtle. Well-known southern shrub. Immense panicles of crinkled little flowers. Showy all summer. We offer these in White, Pink, Purple, and Red. Choice 2 to 3-ft. size, **\$1.25 each; 3 or more, \$1.00 each.**

Forsythia, or Golden Bells. An early-blooming shrub producing deep yellow, bell-like flowers in spring, before leaves appear. Hardy and quite showy. Select 2 to 3-ft. size, **\$0.85 each; 3 or more, \$0.75 each.**

Honeysuckle, Fragrant. Very fragrant, creamy flowers in early spring. Foliage remains nearly all winter. Very desirable, compact plant. Hardy. Select 2 to 3-ft. size, **\$0.85 each; 3 or more \$0.75 each.**

Honeysuckle, Zabeli. One of the most shapely shrubs, with the finest foliage of all the bush Honeysuckles. A marvelous accent or specimen shrub. Attractive blue-green leaves, profuse red flowers in spring, and long-lasting red berries in late summer and fall. Select 2 to 3-ft. size, **\$1.25 each; 3 or more, \$1.10 each.**

Hydrangea, P. G. Old-fashioned, favorite shrub. Flowers creamy white, tinged with pink in late summer. Hardy. Select 18 to 24-in. size, **\$0.85 each; 3 or more, \$0.75 each.**

Hydrangea, Blue. Massive flowers, lasting for weeks and very showy. For best results, plant in moist, acid soil, using peat moss or similar organic material. Strong 2-yr. plants, **\$1.50 each; 3 or more, \$1.40 each.**

French Lilacs. An old shrub, more in demand than ever, because of much improved varieties. You are sure to enjoy these beautiful French Hybrid Lilacs. They will last a lifetime, blooming the first year after planting and annually thereafter. We offer Double Purple, Red and White. Choice 18 to 24-in. size, **\$1.50 each; 3 or more, \$1.25 each.**

Mock-Orange, Sweet. A very fine shrub. Has large-petaled, double crested flowers in clusters. Hardy. Select 2 to 3-ft. size, **\$0.85 each; 3 or more, \$0.75 each.**

Flowering Quince. Large shrub with scarlet blooms in early spring, followed by fragrant, yellow, quince-like fruits that hang on all season. Select 18 to 24-in. size, **\$1.00 each; 3 or more, \$0.85 each.**

Snowberry. Bushy, handsome, dark green foliage, with profusion of waxy white berries in fall. A garden-club favorite. Quite showy. Hardy. Select 2 to 3-ft. size, **\$0.85 each; 3 or more \$0.75 each.**

Spirea, Anthony Waterer. Valuable dwarf, compact shrub. Excellent for foundation or border planting. Rosy crimson flowers borne in flat clusters at tips of branches during most of the season. Select 15 to 18-in. size, **\$1.00 each; 3 or more, \$0.85 each.**

Spirea Thunbergi. Graceful bush covered with small white flowers in very early spring. Tiny fern-like leaves, turning to orange in the fall. Select 2 to 3-ft. size, **\$0.85 each; 3 or more, \$0.75 each.**

Spirea Vanhouttei. Most popular of the Spireas. Grows rather tall, with graceful, drooping branches. Great profusion of white flowers in early spring. Select 2 to 3-ft. size, **\$0.85 each; 3 or more, \$0.75 each.**

Sweet Shrub (Calycanthus). Desirable old-fashioned shrub much in demand. Flowers chocolate colored, with spicy fragrance. Hardy. Select 2 to 3-ft. size, **\$0.85 each; 3 or more, \$0.75 each.**

Tamarisk, African. A strong-growing shrub with bright green, feathery foilage. Deep pink flowers in May. Hardy. Select 2 to 3-ft. size, **\$0.85 each; 3 or more, \$0.75 each.**

Weigela, Old-Fashioned. Drooping branches covered with an abundance of pink, bell-shaped flowers in spring. Grows to large size and is quite hardy. Select 2 to 3-ft. size, **\$0.85 each; 3 or more, \$0.75.**

Weigela, Red. Same as old-fashioned Weigela except that the flowers are deep carmine-red. An excellent shrub, very striking and showy. Hardy. Select 2 to 3-ft. size, **\$1.25 each; 3 or more, \$1.10 each.**

FLOWERING TREES

Trees of Unmatched Beauty! Stately and Handsome!

These delightful ornamental trees are extremely decorative when in bloom but are also attractive when clothed with summer foliage. They are outstanding landscape material.

Crab-Apple, Flowering. Among the loveliest of all flowering trees. Quantities of spring bloom, followed by an abundance of showy small apples in varying hues. Highly ornamental and valuable in any planting. Tree form. We offer Eleyi, best red, and Hopa, preferred rose. **Select 3 to 4 ft. size, \$2.00; 4 to 6 ft. size, \$2.50 each.**

Dogwood, White-flowering. Lovely four-petaled white flowers in spring on horizontally branched tree with spreading open top. Red berries in the fall. **Select 2 to 3 ft. size, \$1.50 each; 3 to 4 ft. size, \$2.00 each; 4 to 5 ft. size, \$2.50 each.**

Dogwood, Pink-flowering. A lovely flowering tree. Beautiful four-petaled pink flowers in early spring. Does best in moist soils. Very striking effect when combined with white variety. **Select 2 to 3 ft. size, \$3.00 each; 3 to 4 ft. size, \$4.00 each.**

Note:—Add \$1.00 each per plant for B&B Dogwood, both White and Pink varieties. Above quotations are bare-root.

Peach, Dbl. Red Flowering. Very double flowers like little roses in spring. Suitable for specimen or large group planting. We offer very showy and prolific strain. **Select 2 to 3 ft. size, \$1.25 each; 3 to 4 ft. size, \$1.50 each; 4 to 6 ft. size, \$2.00 each.**

Peach, Red-leaf. The new sensational three-purpose tree. Ornamental blood-red foliage and a profusion of deep rose blooms, followed by edible red fruit which is excellent for pickles. You'll be delighted with this novelty. **Select 2 to 3 ft. size \$1.50 each; 3 to 5 ft. \$1.75 each.**

Prunus Pissardi, or Purple-leaf Plum. Small tree with compact leaves of rich dark purple and maroon. Stays red throughout season. Very lovely with contrasting delicate white blooms in early spring. Colorful and showy in any planting. **Select 2 to 3 ft. size, \$1.25 each; 3 to 4 ft. size, \$1.50 each.**

Tulip-Tree. A tall, pyramidal tree of stately beauty. Large, glossy leaves; huge, tulip-shaped flowers in early spring. **Select 5 to 6 ft. size, \$2.00 each; 6 to 8 ft. size, \$2.50 each.**

Redbud, Eastern. Beautiful, well-known, ornamental tree, having double, reddish purple flowers in spring before leaves appear. Very striking and a general favorite. Hardy. **Select 4 to 5 ft. size, \$1.50 each; 5 to 6 ft. size, \$2.00 each; 6 to 8 ft. size, \$2.50 each.**

Mimosa, or Silk-Tree. Attractive, lacy foliage on a low spreading tree. Large heads of pink, sweet-smelling flowers in May. Very graceful and lovely. Rapid grower. **Select 5 to 6 ft. size, \$2.25 each; 6 to 8 ft. size, \$2.50 each.**

Linden, American. A large, formal tree. Leaves dark green, yellow in fall. For street and specimen planting. **Select 5 to 6 ft. size, \$2.50 each; 6 to 8 ft. size, \$3.75 each.**

Magnolia Soulangeana. Large lily-like, fragrant flowers in dark purplish red; early. Very hardy. Grows to 12 to 15 feet. **Select 2 to 3 ft. size, mossed, \$3.50 each; 3 to 4 ft. size, \$4.50 each.**

HYBRID TEA ROSES

Queens of the Garden—For All-Summer Bloom from Coast to Coast

BUSH ROSES

A well-cared-for Rose garden is not only a thing of beauty on the home grounds, but will give magnificent blooms for house decoration. There are many choice bush Roses that will bloom from early summer until frost. We have endeavored to list the best-known and most popular sorts which are sure to give good results.

Crimson Glory. Glorious velvety crimson color and rich deep fragrance are perfectly combined in this Rose and succeed in making it tops in the estimation of thousands of Rose lovers. Semi-double, large, cupped in form. Leathery foliage, bushy plant.

Etoile de Hollande. A standard for comparison among red Roses. Bright red, quite unfading; upright stem. Foliage soft. Intermittent all-season bloom.

Better Times. Beautiful, long pointed buds, brilliant cerise in color. Double, fragrant, long stemmed plant. A wonderful rose.

Red Radiance. One of the most dependable Roses and a universal favorite. Vigorous grower of a clear, even shade of red. Plant several for a constant supply of bloom.

Editor McFarland. One of the finest pink garden Roses grown today. Its long-pointed buds on nice long cutting stems last longer and retain their form wonderfully well. A Rose that should be in every garden. Very fragrant; glowing pink, slightly suffused yellow. Good foliage and very vigorous, bushy plant. Excellent bloom.

Pink Radiance. The most dependable of all pink Roses. Brilliant rose-pink buds with light tints on the reserve side of petals, opening to large, globular blooms. Strong, vigorous grower. Abundant, recurrent bloom; very fragrant.

ECLIPSE. Long, streamlined buds that are perfect for cutting. Golden yellow, lightening a little with age. The open flower is semi-double and is carried on a strong stem. A profuse bloomer; very strong and dependable.

Caledonia. Purest white; large, perfectly formed buds on strong stems, opening into large flowers that retain their form until petals fall. No white Rose surpasses this variety. Very vigorous plant with abundant, recurrent bloom.

Countess Vandal. Orange-copper in the bud; flower brilliant pink and salmon, with yellow at the base. Large, double and fragrant, making a splendid cut flower. Vigorous and bushy plant, blooming profusely. \$1.35 each; 3 for \$3.40.

Condesa de Sagago. One of the showiest of the two-toned yellows. Bud ovoid; flower very large, double, cupped, fragrant, Oriental red and yellow—distinctly two-color. Large, glossy, dark foliage. Very vigorous plant and a free bloomer.

CLIMBING ROSES

Where there is seemingly no room for bush Roses, the climbers may find a place in the fence corner and other out-of-the-way places, reaching out and covering old fences or walls and giving a mass of gorgeous bloom. Climbing Roses are easy to grow, are useful in many places, and will give an abundance of bloom the second season.

Paul's Scarlet Climber. No other Rose shows such brilliant, fiery scarlet blooms. The flowers are of medium size and are produced in clusters of five to ten or more, each stem being a veritable bouquet. Of strong climbing habit and perfectly hardy.

Talisman. The favorite of many—a glorious combination of orange, yellow, and rose-red. Buds long pointed; florets double, fragrant, much more highly colored in autumn, with long stems. Foliage large, rich green, leathery. Vigorous.

All Roses, choice 2-yr., No. 1 plants, \$1.25 each; 3 or more \$1.10 each.

SUPERB ROSE GARDEN COLLECTION

Average Bearing Age and Planting Distances of Fruits and Nuts

FRUITS

<i>Variety</i>	<i>Age of Bearing</i>	<i>Planting Distance</i>	<i>No. Per Acre</i>
Apple, Standard	2 to 8 yrs.	35x35 ft.	35
Apple, Dwarf	2 to 3 yrs.	15x15 ft.	193
Apricot	2 to 3 yrs.	10x20 ft.	108
Blackberries	1 yr.	3x 6 ft.	2,420
Blueberries	2 to 3 yrs.	4x 4 ft.	2,722
Boysenberries	1 yr.	6x 8 ft.	907
Cherry, Pie	2 to 3 yrs.	20x20 ft.	108
Cherry, Sweet	4 to 5 yrs.	20x20 ft.	108
Figs	1 to 2 yrs.	15x15 ft.	193
Grapes	2 yrs.	6x 8 ft.	907
Nectarines	2 to 3 yrs.	20x20 ft.	108
Peach	2 to 3 yrs.	20x20 ft.	108
Pear	2 to 3 yrs.	20x20 ft.	108
Plum	2 to 5 yrs.	20x20 ft.	108
Quince	2 to 5 yrs.	15x15 ft.	193
Raspberries	1 yr.	3x 6 ft.	2,420
Strawberries	1 yr.	1x3½ ft.	9,900

NUTS

Chinese Chestnut	2 to 5 yrs.	30x30 ft.	48
Filberts	2 to 5 yrs.	15x15 ft.	193
Pecans	4 to 8 yrs.	40x40 ft.	28

Time required for trees and plants to begin fruiting after being transplanted may vary considerably, depending somewhat on the age and size of plant at time of transplanting, as well as the nature of the soil, care given, the season, and many other conditions. Even some varieties of a class will begin fruiting earlier than others. So the above table gives only approximate bearing ages under normal conditions.

Number of Trees or Plants to the Acre (Square System)

RULE—Multiply the distance in feet between the row by the distance the plants are: number of square feet for each plant, which, divided into the number of square feet in the acre (43,560), will give the number of plants or trees to the acre.
